Sir:

Responsive to the Office Action mailed September 13, 1999, a one month extension of time being hereby requested with fee attached, please amend the above-identified application as follows.

IN THE CLAIMS

*John E.* 17. (Four Times Amended) An artificial bait structure, comprising:  
a head having a forward end and a rearward end; and  
first and second legs extending rearwardly from the rearward end of the  
head, wherein each leg defines an inner edge and an outer edge and terminates at a  
5 rearward end, and wherein the inner edge of each leg includes a generally linear portion  
adjacent the rearward end of the leg, wherein the generally linear portions of the legs face  
each other, and wherein the inner edge of each leg further includes an outwardly curved  
[smooth, continuous] concave arcuate portion adjacent the rearward end of the head  
extending toward the outer edge of the leg forwardly of the linear portion, wherein the  
10 outwardly curved concave arcuate portions of the leg inner edges cooperate to define a  
void area having a concave configuration between the legs rearwardly of the head, wherein
